offers an array of book printing services, library book, pdf and such as book cover design, text formatting and design, ISBN assignment, and more.

Accident Reconstruction

Accident reconstruction is the process using scientific methodology to determine the circumstances, mechanics, and contributing factors associated with a collision. It requires a working knowledge of many disciplines including physics, vehicle dynamics, mathematics, photogrammetry, and computer applications (i.e. spreadsheets, AutoCAD, simulation or modeling tools, graphics and photo-management software).

Auto accident reconstruction: The basics you must know

Traffic collision reconstruction is the process of investigating,

Acces PDF Accident Reconstruction

analyzing, and drawing conclusions about the causes and events during a vehicle collision. Reconstructionists conduct collision analysis and reconstruction to identify the cause of a collision and contributing factors including the role of the driver, vehicle, roadway and general environment. Physics and engineering principles are the basis for these analyses and may involved the use of software for calculations and simulations. C
