### **Definition**

Abstract: The integration of activity-based costing (ABC) and environmental cost accounting (ECA) systems provides companies with more accurate information to make both well-rounded and effective decisions. The purpose of this study is to propose an effective approach to integrate both ABC and ECA systems.

### **Integrating activity-based costing and environmental cost ...**

In an environmental accounting context, it distinguishes between environment-related costs, which can be attributed to joint cost centres (e.g. incinerators and sewage plants), and environment-driven costs, which tend to be hidden on general overheads, e.g. increased depreciation or higher cost of staff. For example, activity-based costing may be used to ascertain more accurately the costs of washing towels at a gym.
