Acute Respiratory Distress Syndrome Second

Acute respiratory distress syndrome (ARDS) occurs when fluid builds up in the tiny, elastic air sacs (alveoli) in your lungs. The fluid keeps your lungs from filling with enough air, which means less oxygen reaches your bloodstream. This

The terms “acute lung injury” (ALI) and “acute respiratory distress syndrome” (ARDS) describe syndromes of acute onset, bilateral, inflammatory pulmonary infiltrates and impaired oxygenation. The first known description of ARDS arrived with the invention of the stethoscope; Laennec described fatal “idiopathic pulmonary edema” in his
