Label: Locate each organelle in the animal cell.

Cell Structure Answer Key

The cell is the basic unit of life. All organisms are made up of cells (or in some cases, a single cell). Most cells are very small; in fact, most are invisible without using a microscope. Cells are covered by a cell membrane and come in many different shapes. The contents of a cell are called the protoplasm. Glossary of Animal Cell Terms: Cell ...

Animal Cell Anatomy - Enchanted Learning

According to the definition, animal cell is the dominant tissue cell in animals. As well as plant cells, animal cells have eukaryotic cell structure. They include a range of multicellular advanced membrane bound organelles. However, animal cells don't have chloroplasts and a number of vacuoles. They don't have the cell wall, so their shape ...
