Berkeley DB Java Edition | Database | Oracle

Berkeley DB Java Edition (JE) is a pure Java database management library. Its design resembles that of Berkeley DB without replicating it exactly, and has a feature set that includes many of those found in the traditional Berkeley DB and others that are specific to the Java Edition.

Berkeley DB - Wikipedia

In Berkeley DB Java Edition, an object of class Environment is mandatory to work with a BDB database. The first step in opening the database is creating this Environment object will a call to “new Environment”. The first argument to this call is the path where the data of the environment (including the databases in it) is located.

How to use Berkeley DB Java Edition » OpenAlfa Blog

Berkeley DB Java Edition 5.0 was just released. There are a number of new features, enhancements, and options in there that our users have been asking for. Chief among them is a new class called DiskOrderedCursor, which greatly increases performance of systems using spinning platter magnetic hard drives.

Patch Update are: Oracle Berkeley DB, versions prior to 6.1.38, prior to 18.1.40; Oracle Big Data Graph Executive Summary

Oracle Critical Patch Update Advisory - July 2020

The Oracle Berkeley DB family of open source, embeddable databases provides developers with fast, reliable, local persistence with zero administration. Often deployed as an 'edge' database, Oracle Berkeley DB provides very high performance, reliability, scalability, and availability for application use cases that do not require SQL

Oracle Berkeley DB

Of course, releasing an application which includes Berkeley DB, Berkeley DB Java Edition or Berkeley DB XML under an open source license does not change the requirements of our open source license, and the Berkeley DB source code remains subject to the terms of the open source license governing its use and redistribution.

Oracle Berkeley DB Licensing Information

`public java.util.SortedMap<java.lang.String,java.lang.Long> getReplicaDelayMap()` Returns a map from replica node name to the delay, in milliseconds, between when a transaction was committed on the master and when the master learned that the transaction was processed on the replica, if known.

ReplicatedEnvironmentStats (Oracle - Berkeley DB Java ...

Berkeley DB now supports compression when using BTree. Berkeley DB introduces a new utility named `db_sql` which replaces `db_codegen`. Similar to `db_codegen`, `db_sql` accepts an input file with DDL statements and generates a Berkeley DB application using the C API that creates and performs CRUD operations on the defined tables.
