Building Honda K Series Engine

Based on Honda K-series architecture, 4 Piston begins with a production K24A1 block from an Acura TSX. The block, although a factory casting, undergoes major surgery to prepare it for nearly a five-time boost in power. The engine is treated to full machining and the installation of ductile iron cylinder liners from Ramey Racing.

How to Build a 1,000HP Honda K Series - Wiseco

The all-new K-series engines are now found in all Honda and Acura performance models, and are also becoming the engine swap of choice. Building Honda K-Series Engine Performance , author Richard Holdener gives you a detailed description of the K-series engines, the various kinds of aftermarket performance parts available, and describes how these parts perform on the dyno.

Building Honda K-Series Engine Performance (Performance ...

The Honda K-series engine is a line of four-cylinder four-stroke car engine introduced in 2001. The K-series engines are equipped with DOHC valvetrains and use roller rockers to reduce friction. The engines use a coil-on-plug, distributorless ignition system with a coil for each spark plug.

Building a Honda Engine - Honda Performance Guide - Super ...

The Honda K series of engines is one of our favorites and one of the top production inline 4 engines ever produced in our opinion. Last year we built a turbo K24 Z7 for a giveaway by Motovicity. With the turbo project being put to bed we got another opportunity to build a K motor, this time in the form of a naturally aspirated K24 Z7.

Building the Naturally Aspirated Honda K Engine! Part 1 ...

In a world of every increasing engine output, 1,000-plus horsepower is still big news; and from a 4 cylinder no less. Luke Wilson of 4 Piston Racing used the Wiseco pistons booth at the 2017 PRI show to showcase the shop's latest build offering: a 1,200hp-cabable Honda K series that can be street driven.

4 Piston Racing's 1,000hp-Plus Honda K Series Build

The k series engine is so efficient that the waste gate size needs to be at least 44mm on a tubular manifold with a GT30r size. If anything less is used, massive boost creep can/will occur. On GT35r and larger turbos we suggest either (2) 44mm gates or one 60mm gate.

Honda K-Series Pre-Tuning Checklist - Evans Tuning

The B- and K-series engines both have thoroughly over-engineered blocks that can live with gobs more horsepower than Honda ever intended. But, when compared side-by-side, the K-series is clearly the more innovative and perfected platform — and why wouldn't it be? It's ten years the junior and the natural evolution of the B-series motor.
