will positively impact patient care. As more of the population ages, as life expectancy increases, and as the nursing shortage continues, these new medical technologies are crucial for continued patient care, and the health care system ...

## **7 Nursing Technologies Transforming Patient Care**

Between 2010 and 2050, the senior population is expected to reach 88.5 million, or 20 percent of the U.S. population, greatly increasing the need for senior care. Home health care will then become an even more significant element of the continuum of care. As our elderly population increases, it will require higher levels of health care that are more affordable and can be delivered at home.
