The case study interview is a critical piece of the employee selection process for professional service firms. For consultancies, its specific purpose is to assess aptitude for partner-track roles. Historically, the case study interview has been used to hire associate-level employees - those who are expected to work directly with business clients and produce a stream of billable services.

Abstract. The analysis of conversational repair provides one route into understanding how young children learn the skills required for participating in talk. One key aspect of repair is the ability to respond appropriately to other participants. Employing a longitudinal case study approach, this article examines in detail the conversational repair skills of one child during the period where she is acquiring core conversational abilities and competencies (from 1;0 to 3;10).
