When prescribing medication, what dosage is enough, and what dosage is too much? These questions are explored in the Drug Dosage Gizmo. In this Gizmo, students are responsible for providing treatment to a simulated patient. By monitoring patient feedback as well as the concentration of medicine within the body, students practice developing a dosage schedule for a variety of medication types.

Explanation: In the first step, the initial amount of dye is 20 mL, and the dye remaining after the exchange has been performed is 16 mL. A total of 4 mL, or one-fifth (20%) of the dye has been removed from the container. This means that one-fifth of the water in the container, or 2.0 L, has been removed and replaced with fresh water.
