This text is designed to introduce undergraduate students to digital signal processing (DSP) and real signals. The authors take a multimedia approach that concentrates on sound and image signals and their manipulation using the methods of DSP. A CD-ROM, which is seen as being more important than the text, contains demos, labs, exercises, homework problems with solutions, and many actual signals and sound files that can be viewed with a Web browser or imported into MATLAB.

DSP First: A Multimedia Approach PDF

DSP First and it's accompanying digital assets are the result of more than 20 years of work that originated from, and was guided by, the premise that signal processing is the best starting point for the study of electrical and computer engineering. The "DSP First" approach introduces the use of mathematics as the language for thinking about engineering problems, lays the groundwork for subsequent courses, and gives students hands-on experiences with MATLAB.
