F-1 Engine Recovery | Bezos Expeditions

2044 is the Rocketdyne serial number that correlates to NASA number 6044, which is the serial number for F-1 Engine #5 from Apollo 11. The intrepid conservator kept digging for more evidence, and after removing more corrosion at the base of the same thrust chamber, he found it - "Unit No 2044" - stamped into the metal surface.

F-1 Engine Recovery | Bezos Expeditions

The recovery area was strewn with wreckage from over half a dozen Apollo missions. Each first stage mounted five F-1 engines. Our goal was to find and recover one or more F-1 engines from the massive first stage of Apollo 11, man's first flight to the lunar surface. There were 18 concentrations of debris with engine-like sonar contacts.
