fan cart physics gizmo answers key - PDF Free Download

A fan cart, with frictionless wheels and negligible air resistance is placed on a level surface with the fan applying a constant force to the cart. The fan propels the cart at: (pick the best answer) i. constant velocity ii. increasing velocity iii. decreasing velocity iv. increasing, then constant velocity b. A rock is thrown straight upward.

Answered: a. A fan cart, with frictionless wheels... | bartleby

Then, when the force on the cart was .98 Newtons, the average acceleration was 1.63 m/s/s. This is a marked increase in acceleration and force which starts a pattern that is continued for the next set of trials in which the force was 1.96 Newtons. When the force exerted on the cart was 1.96 Newtons, the average acceleration was 2.87 m/s/s.

Newton's Second Law Lab Answers | SchoolWorkHelper

Correct Answer: B. Cart B. A cart with one fan on it blowing to the left and carrying one block produces the x vs t graph shown. If this cart were carrying three blocks instead of one, with the fan still blowing the same direction, what could the x vs t graph look like?
