Researchers in the FREEDOM program also plan to unify electronic warfare with cyber technology, which typically remains separated in operations, research and system development. The program aims to provide both basic and applied research to enable tactical dominance in an Army initiative called cyber electromagnetic activities, or CEMA.

### **US Army Researchers Pursue Tactical Edge in Electronic ...**

Command and control cultures emulate the military model where decisions are made by seniors officers, and those in the lower ranks are given their orders. Given that we live in a democracy outside of work, there is inherent conflict within organizations that are more command and control than collaborative.
