From Dev to Ops: An Introduction | AppDynamics

Along with the barriers between Dev and Ops, these perceptions too, must be dismantled, but with caution! Before continuing, let's first tackle some myths surrounding the role of QA in DevOps. Some would suggest that the Development-Operations merger eliminates the need for a dedicated QA function. This is far from reality.

From Dev and Ops to DevOps

From Dev to Ops: An Introduction 6 1. Place order for development, testing, user acceptance testing, production, and infrastructure. Usually about an 8-week lead time. 2. Development team does works on testing while ops personnel are filling out miles of virtual paperwork to get the infrastructure in place. Much discussion occurs

DevOps: A cheat sheet - TechRepublic

DevOps means Development and Operations working together collaboratively to put the Operations requirements about stability, reliability, performance into the Development practices - while at the same time bringing Development into the management of the Production environment. For example, by putting them on-call, or by leveraging their ...

Where's the Ops in DevOps? Part 1 - Redgate Software

Under a DevOps model, development and operations teams are no longer "siloeed." Sometimes, these two teams are merged into a single team where the engineers work across the entire application lifecycle, from development and test to deployment to operations, and develop a range of skills not limited to a single function.

What is DevOps? - Amazon Web Services (AWS)

The Ops team's goal is to limit changes to their system, but they apprehensively release the code and the system crashes. The finger pointing resumes. Ops says that Dev provided them faulty artifacts. Dev says everything worked fine in the test environment. The fire drills begin to debug the system and get production stable.

What is DevOps? The Ultimate Guide to DevOps

DevOps means Development and Operations working together collaboratively to put the Operations requirements about stability, reliability, performance into the Development practices - while at the same time bringing Development into the management of the Production environment.
