Solution. Suppose that
the unit sphere
contains a line
segment $[x;y]$ where
 $x;y \in X$ and $x \neq y$.

Then $kax + (1 - ia)yk = 1$

Solutions Manual

for any $a \in [0,1]$:
Choose $a = \frac{1}{2}$ then
we get $\| \frac{1}{2}(x+y) \| = 1$, that is $\|x+y\| = 2$:
Since x and y belong to
the unit sphere, we
have $\|x\| = \|y\| = 1$.
Hence $\|x+y\| = \|x\| + \|y\|$: Let us show
that x, y are linearly
independent. Assume $y = \alpha x$ for some $\alpha \in \mathbb{C}$.
We have

**analysis), spring
2006.**

This is a very well written applied math textbook. Though written primarily for engineers, readers in other disciplines will find it useful too. I do research in finance and this textbook has come in very handy. Also try Kreyszig's Introduction to Functional Analysis and Applications, another great textbook.
