This book shows how to apply principles of architecture and library science to design cohesive Web sites and intranets that are easy to use, manage, and expand.

O'Reilly - Information Architecture for the World Wide Web

Information architecture is to a website, library or shop, what the concrete foundations are to a house. To create the best possible foundations, we need to create an IA document. Creating the document happens in a few stages that will be explained below. Companies should spend time on this, and see it as a worthwhile investment.

A Beginner's Guide To Information Architecture in UX (2020)

Information architecture (IA) focuses on organizing, structuring, and labeling content in an effective and sustainable way. The goal is to help users find information and complete tasks. To do this, you need to understand how the pieces fit together to create the larger picture, how items relate to each other within the system.
