DSST Computing and Information Technology: Study Guide ...

Software refers to the programs that you use on your computer (like a word-processing program) or the programs that make your computer work (you physically cannot touch these). Programs are also called applications. CPU (Central Processing Unit): This box is the brain of a computer system. It processes, stores, and communicates information.

Computer Basic Skills - Net Literacy

Computers use both hardware and software to perform their work. Think of hardware as the physical pieces of a computer—the monitor, all the pieces and parts inside the casing, the mouse, the keyboard, etc. Software, on the other hand, consists of programs that we use to interact with the computer.
