Overview

In early 2012, ITU-R embarked on a programme to develop “IMT for 2020 and beyond”, setting the stage for 5G research activities that were emerging around the world. A year after, through the leading role of Working Party 5D, ITU’s Radiocommunication Sector (ITU-R) finalized its view of a timeline

interfaces, in October 2017, 3GPP groups are now working on the initial description of the 3GPP 5G solution - based on LTE evolution and the first 5G NR specifications approved in December - has now been sent over to the ITU in accordance with the IMT-2020 submission and evaluation process.

Submission of initial 5G description for

IMT-2020

ITU plays a leading role in managing the radio spectrum and developing globally applicable standards for IMT-2020. ITU is working towards providing stable international regulations, sufficient spectrum and suitable standards for IMT-2020 and the core network to enable successful 5G deployments at the regional and
