The Lodestar is a compact stand-alone USB2.0 guide camera featuring the large, sensitive Sony ICX429AL Exview CCD. Suitable for most mounts with a standard autoguider input. As small as a 1.25" eyepiece!

Starlight Xpress Lodestar Autoguider | First Light Optics

The SX Lodestar X2 utilizes a very sensitive Sony 'ExView' CCD (the ICX829) with an array of 752 x 582 pixels in a 'half-inch' format. Although the chip is not cooled, it has a very low dark signal and very little readout noise, so it can be used to guide on faint stars that are beyond the reach of webcams and CMOS chip based guide cameras.

LodeStar Guider Camera | Anthony's Astrophotography

The original Lodestar uses the ICX429 Exview chip from Sony and offers excellent sensitivity. However, Sony have now upgraded the ICX429 to the ICX829, with considerably improved QE and read noise. This new 'Exview 2' chip approximately doubles the Lodestar sensitivity and adds nearly a full star magnitude to the minimum guide star brightness.

Lodestar X2 Autoguider - Telescopes, Cameras & Accessories

Starlight Xpress Lodestar x2 Monochrome Autoguider FREE shipping to UK Mainland! The NEW Lodestar x2 is, as the name suggests, about twice as sensitive as the standard Loadstar camera and so it is recommended for guiding systems with very long focal length when used in a OAG setup.
