White Balance (WB) White balance is how you set the color balance, and color is critical to every image. I use AUTO1 WB and set a slight color shift to make all my images slightly warmer (more orange), and remove the D800's slight green bias. I set A (amber) 3 and M (magenta) 1 in the Shooting Menu.

Nikon D800 and D800E User's Guide - Ken Rockwell
So I know how to do it. Press the WB button and move the dial to Pre, then use the sub-dial to move it to d-1, d-2, d-3, or d-4. Then let go and Hold down the WB button a couple seconds until it blinks and shoot a gray-card. It's worked in the past but for some reason now it will never blink PRE so it won't shoot the WB.

Why can't I get the Whitebalance preset to set? (D800 ...
After I published the article on the recommended settings for the Nikon D600 / D610, I received plenty of requests from our readers that asked me to write a similar article for the Nikon D800 and D800E cameras.Since I own and use both frequently, I decided to expand the series to other cameras. In this article, I want to provide some information on what settings I use and shortly explain what ...

White balance and colour. In most cameras, I find auto white balance (AWB) gives a slightly cool colour balance in all situations except tungsten light, where it is usually too warm. The same is true with the Nikon D800. However, a second AWB option is designed to keep warm tones of light, which is ideal for maintaining ambience.

Nikon D800 review - Amateur Photographer
Open Shade White Balance (left) gives the scene more warmth, but Auto White Balance (right) results in whiter whites. Auto White Balance (right) warms up the ship's interior, which was lit by incandescent light, but the Incandescent setting (left) captures all the tones as they really were, adding a feeling of depth to the scene.
