You can quickly add fields to a form or report by using the Field List pane. When you double-click a field in the Field List pane (or if you drag a field from the list to your form or report), Microsoft Access automatically creates the appropriate control to display the field — for example, a text box or check box — and then binds the control to that field.

## **Access 2003 report by date range - Microsoft Community**

There is a very simple way to number records sequentially on a report. It always works regardless how the report is sorted or filtered. With your report open in Design View: From the Toolbox (Access 1 - 2003) or the Controls group of the Design ribbon (Access 2007 and later), add a text box for displaying the number.
