In Excel 2019, I have a master Sales file that auto feeds information from all 5 stores monthly sales excel spreadsheets. When i open up a store Sales spreadsheet and then open my master Sales spreadsheet, after i click update on the master, all the formulas change on my master. It changes the row # so it does not pull from the correct row.

Excel 2019 Formulas change. What am I doing wrong ...

The cells with formulas don't pick up the new data. I have tried F9 and that doesn't work. The only thing that works is to either re-enter the data manually or I can copy and paste the data right back into the same cells and then the formula picks up the new data. The client has specific formulas that they do not want to be changed.
