Step 1, Secure the object being lifted. Ensure that the load that is to be lifted has been properly secured to prevent inadvertent movement during the lifting process. Step 2, Close the release valve using the handle. Locate and close the release valve by turning it fully clockwise. Remove the handle from the handle sleeve. Do not over-tighten when closing the release valve as damage to the threads and seals may occur. Step 3, Position the jack saddle. Center the saddle under the proper ...
