Nike Inc Cost Of Capital

Cohen calculated a weighted average cost of capital (WACC) of 8.4 percent by using the Capital Asset Pricing Model (CAPM) for Nike Inc. I do not agree with Joanna Cohen because of below mentioned: -In the field of Equity's Cost: O She should use current yields on US Treasuries 3 to 12 months at 3.59% because the yield curve is upward sloping.

Case Analysis of Nike, Inc.: Cost of Capital | Case Study ...

VII. Conclusion. Kimi Ford should recommend to the NorthPoint Group Board that acquiring Nike Inc. shares is a SOUND INVESTMENT. To discount cash flows in Exhibit 2 with the calculated WACC of 9.95 percent, the present value of Nike is \$65.71 per share, which is more than its current market price of \$42.09.

Nike, Inc.: Cost of Capital - HubPages

$5.74\% + (5.9\%)*0.69 = 9.81\%$. We agree that the single cost of capital is the best way to value the cash flows for the entire firm. Other segments have similar risk, therefore single cost is sufficient. Nike has multiple segments that contribute to revenue. Sports balls, apparel, skates, bats etc.

Case Study: Nike, Inc. : Cost of Capital by Issac George
