A Set of Multilevel
Voltage Networks
Modular Medium-
Voltage High Power
Converters for 10-MW
Wind Turbines.
Abstract: Medium-
voltage power
conversion is generally
favored for future large
wind turbines, e.g., 10
MW, in terms of higher
power density, reduced
current level,
associated losses, and
cost of power cables,
switchgears, etc.

M2C technology - in

Download Free Power Converters

brief An M2C medium voltage converter consists of several low voltage cells. Switched in series, they generate an output voltage at medium-voltage level. Within the converter, each cell can be controlled individually, and each has a local energy storage unit that contributes a proportion of the link voltage.
