normally select the alternative that will best serve the long-term interests of the owners of the organization. In engineering economic analysis, the primary criterion relates to the long-term financial interests of the owners. This is based on the assumption that available capital will be allocated to provide maximum monetary return to the owners.

principles of engineering economics moves you a step closer toward making an economics-related decision. The first two principles -- making a list of alternatives and identifying the differences between each alternative -- set up the thought process. The next three principles focus on evaluation criteria.
