- Premise of the study: The most recent reviews of the reproductive biology and sexual systems of parasitic angiosperms were published 17 yr ago and reported that dioecy might be associated with parasitism. We use current knowledge on parasitic lineages and their sister groups, and data on the reproductive biology and sexual systems of ...

American Journal of Botany

DNA evidence supports a South American origin for marsupials, with Australian marsupials arising from a single Gondwanan migration of marsupials from South America, across Antarctica, to Australia. There are many small arboreal species in each group.

Marsupial - Wikipedia

The paca is a South American rodent with potential as a commercial food animal. We examined paca placenta as part of a wider effort to understand the reproductive biology of this species. Thirteen specimens between midgestation and term of pregnancy were studied by light and transmission electron microscopy. The placenta is divided into several lobes separated by interlobular trophoblast.
