Taxonomy Project IN THE YEAR 2525 Humans, after hundreds of years of constant effort, have successfully polluted all bodies of water on Earth. As a result, almost all previously known species of plant, animal, and other life have become extinct. Through natural selection, genetic engineering, and selective breeding programs, a portion of the Earth has been successfully repopulated.

Taxonomy Project.doc - Taxonomy Project IN THE YEAR 2525 ...
This is a project for advanced students of biology studying taxonomy. In this activity, students design organisms following guidelines about what the organisms look like and what they eat. They develop a classification system for these imaginary creatures that includes kingdom, phylum, genus and species.
