STRYK System Improvement / NAV/SQL Performance Field Guide

After 13 years the "NAV/SQL Performance Field Guide" is finally out of print. The last print edtion was published in 2014. This "Legacy Edition" was/is not updated, thus to nowadays reality it is incomplete, outdated and partly wrong. Products have changed, so have Best-Practices. Nonetheless, I can provide this booklet now for free!

NAV/SQL Performance Field Guide – Legacy Edition 2020 After 13 years the “ NAV/SQL Performance Field Guide ” is finally out of print. Well, the last “real” version (5) was published in 2014, but since then I never found the time to keep it updated, so I discontinued that project.

NAV/SQL Performance Field Guide - Legacy Edition 2020 ...

In 2006 I started to put all this into a structured document, one I could use more straight in my optimization workshops - so "The NAV/SQL Performance Field Guide" was born. It's not a replacement of any official NAV/SQL documentation and requires some pre-knowledge about certain issues, but this "braindump" should give feasible advice and practical hints for the daily work with NAV and SQL.

The NAV/SQL Performance Field Guide - 4th Edition - NAV ...

In 2006 I started to put all this into a structured document, one I could use more straight in my optimization workshops - so "The NAV/SQL Performance Field Guide" was born. It's not a replacement of any official NAV/SQL documentation and requires some pre-knowledge about certain issues, but this "braindump" should give feasible advice and practical hints for the daily work with NAV and SQL.

The NAV/SQL Performance Field Guide - 3rd Edition ...

A common and pretty good Best Practice for a SQL Server running NAV is: 1 logical CPU (Core/Thread) per 25 Users/Sessions For example, you run NAV with 100 Users you'll need 4 CPU (as it is with Best Practices, that's just an educated guess, which may need to be adjusted to the individual requirements).

NAV/SQL Performance - My Two Cents on Performance ...

The following articles describe how to optimize performance in Microsoft Dynamics NAV 2018 when accessing data from the SQL Server database. Setting SQL Compatibility Level to Optimize Database Performance. Data Access. Table Keys and Performance. Bulk Inserts. C/AL Database Functions and Performance on SQL Server. Query Objects and Performance

Optimizing SQL Server Performance with Microsoft Dynamics ...

A NAV "BLOB" data-type is actually the "image" data-type in SQL Server (SQL also features other LOB types as "text" or "ntext" but they aren't relevant for NAV). [Out of the box, NAV flags a "BLOB" field with the property "Compressed" = TRUE. If this is enabled, NAV uses a compression algorithm to save the data more compact.

BLOB Fields with NAV & SQL - NAV/SQL Performance - My Two ...

This book will help you setup a SQL instance correctly, Find issues quickly and it gives you hints on how to solve the issues.

Amazon.com: Customer reviews: The NAV/SQL Performance ...

Network performance is improved by the use of the Dynamics NAV Server data cache, which reduces the number of calls to the SQL Server. After one user has read a record, subsequent users who reads the same record get it from the data cache. In earlier versions of Microsoft Dynamics NAV, the data cache was isolated for each user.
