Science of Sin - YouTube

The Science of Sin is a 4-part series that explores the shadowy pathways of the human mind to examine why the temptation to sin is evolutionarily hard-wired and asks if this scientific reality can be trumped by culture,

laws or religion.

The Science of Sin - VisionTV

Religions have been studying human behavior for thousands of years - long before science got into the game. And for Christians, the seven deadly sins have offered a moral and social framework to get folks on the straight and narrow. Neuroscientist Jack Lewis says: we can use that framework to inform our future decisions.

The science of skin - Emma Bryce - YouTube

Science of the Mind teaches that "sin" is merely a mistake. Instead of judgment, they teach that people receive consequences. The Bible, on the other hand, describes sin as any thought or action which breaks God's law. "Sin is the transgression of the law" (1 John 3:4).

Science of the Mind - AllAboutCults.org

Neo-orthodox theologian Reinhold Niebuhr once famously said that original sin is "the only empirically verifiable doctrine of the Christian faith." But what was once "empirically verifiable" is now questioned, and even science is being enlisted as its primary foe. As the story goes, modern science indicates that it is impossible for the breadth of humanity today to...
