Computer vision applications based on videos often require the detection of moving objects in their first step. Background subtraction is then applied in order to separate the background and the foreground. In literature, background subtraction is surely among the most investigated field in computer vision providing a big amount of publications.

Background subtraction in real applications: Challenges ...

Subtraction is taught after the student develops a basic understanding of addition. There is a strong link between addition and subtraction. Subtraction can be performed to find out how much should be added to the smaller number to get the larger number. The equation $6 - 4 = 2$ can also be written as $4 + 2 = 6$.
