deserts because the sand isn't held in place by vegetation and blows easily. Deflation is the main way wind causes erosion, it usually has a great effect on the land and it can create blowouts. Abrasion by wind carried sand can polish rock and causes little erosion.

Erosion and Deposition Worksheet

Download Ebook Weathering Erosion And Soil Answers.docx

Weathering causes the breakup of rocks, but usually those smaller pieces begin to move by wind, water, ice, or even animals. When these smaller pieces, called pebbles, sand, or soil, begin to move by natural forces, it is called erosion.

However, if you use a shovel to move rocks or soil, it is not erosion.
