Cascading Style Sheets. Similar to HTML, CSS is a tool used for web design. In fact, HTML and CSS go hand in hand when it comes to designing a nice-looking website. The main difference between the two is that HTML is used mainly for creating the content of the website, while CSS is used for styling that content.

HTML (the Hypertext Markup Language) and CSS (Cascading Style Sheets) are two of the core technologies for building Web pages. HTML provides the structure of the page, CSS the (visual and aural) layout, for a variety of devices. Along with graphics and scripting, HTML and CSS are the basis of building Web pages
